

ABSOLUTE. PREMIUM. PROTECTION. TM

ABSOLUTE PREMIUM PROTECTION WITH STYLE

Since its establishment in 1987 Wiley X has been a global leader in the protective eyewear market supplying military forces and law enforcement personnel with top of the line ballistic eyewear. Realizing the need to protect your eyes also during leisure and sports, Wiley X is the only premium eyewear brand who tests its entire sunglass collection to both ANSI Z87.1-2010 & EN166 safety and optical standards. This is extremely important as hunters and shooters can easily encounter a stinging branch, a reed in the eye during a duck hunt, a clay fragment on the shooting range or a ricochet.

Our family owned company believes that continual improvement is not just a goal, it is a requirement. Combining premium design with shatterproof lenses and durable frames while implementing unique technologies like our patented Facial Cavity™ Seal has forever been the mission of founder Myles Freeman Sr., whose sons have now picked up the torch.

Hunters and shooters around the world - from the elite professional shooter to the everyday hunter have learned to love Wiley X eyewear over the last 3 decades. The unique features and technical advantages the eyewear bring, combined with sleek stylings are a winning combination. Wiley X will continue to innovate on the forefront of fashion and function in years to come.

The idea of Wiley X was born on the battlefield focusing on protecting our men and women in service, but the vision has been developed over the years to offer Absolute. Premium. Protection. to everyone.

- 34 Apparel & Accessories

TECHNOLOGY

Wiley X premium protective eyewear use the world's most durable and lightweight materials: shatterproof Selenite™ polycarbonate lenses with scratch resistant T-Shell™ hardcoat and virtually indestructible Triloid™ nylon frames.

Wiley X: the only premium eyewear brand whose entire line is safety rated.

ANSI HIGH VELOCITY IMPACT/VD BALLISTIC TESTS

Frames and lenses must withstand the impact of a 6,35 mm diameter steel ball fired at 164,6 km/h (ANSI) or 3,8 mm projectiles fired at 700-720 km/h (spectacle VD Ballistic). This ensures our lenses and frames are practically indestructible.

ANSI HIGH MASS IMPACT TEST

Wiley X ANSI tested frames and lenses must withstand the weight of a 500 grams pointed projectile dropped from a height of 127 cm. This test pretty much ensures that they will stand up to anything you will encounter.

EN.166 STANDARDS

EN.166S (SAFETY GLASSES):

Frame and lens must withstand the impact of a 22 mm steel ball weighing 43 grams dropped from 1,3 meters at a speed of 18 km/h. The lens must remain in the frame and should not be shattered. The frame must remain intact as well.

EN.166F (SAFETY GLASSES):

Frame and lens must withstand the impact of a 6 mm steel ball weighing 0,86 gram fired at 162 km/h. The lens must remain in the frame and should not be shattered. The frame must remain intact as well.

WILEY X SHOOTING TEST AT 10 METERS DISTANCE

WILEY X TAKES IT ONE STEP FURTHER

At Wiley X we are obsessed with eyewear safety and as a world-leading supplier of Hunting and Shooting eyewear we guarantee, that all our products are certified to the highest levels possible. All eyewear styles shown in this catalog are tested for both for high-velocity impacts as well as high mass impacts.

In fact, Wiley X is the only company in the World who certifies all its hunting and shooting styles up against the hardest eyewear test in the world - the military ballistic test. In order to pass this test, the eyewear has to withstand a 3,8 mm fragment fired at 700 km/h at only a distance of 60 cm. (except for WX Rebel ACREB07 - page 30)

But we at Wiley X take it one step further. Every year we conduct several shooting tests of our styles. In fact we test our eyewear to the maximum and beyond. We shoot at more than 1.000 Wiley X lenses at a distance of only 10 meters. Sometimes we shoot the lenses as close as only 5 meters - to make sure that we deliver what we preach.

We often invite national as well as the international magazines for a Wiley X test shooting day. Latest magazines to participate in a Wiley X lens test were Danish hunting/shooting magazine "Jæger" and worldwide distributed magazine Gun Trade World.

PERFORMANCE MARKINGS

All Wiley X styles are ANSI rated and EN.166 certified. We test and mark all of our frames and lenses with the appropriate ANSI and EN.166 markings.

EN.166 CERTIFICATIONS

EN.166(S) - Spectacles with increased robustness certification

EN.166(F) - Spectacles with low energy impact certification

ANSI STANDARDS

WX Z87-1 - The frame and temples passes the ANSI high velocity and high impact standards.

WX Z87-2 - The frame and temples passes the ANSI high velocity and high impact standards, and it can be fitted with prescription lenses.

ANSI STANDARD MARKINGS

- WX Precedes all ANSI rating marks. Wiley X is the manufacturer.
- Z87 The frame and temples passes the ANSI high velocity and high impact test.
- 2 The frame can be fitted with a prescription lens, which is the case with almost all Wiley X glasses.
- + The frame and temples passes the ANSI high velocity and high impact test (2010 standard).
- + The lens meets or exceeds the ANSI High Velocity Impact standard.
- S The lens is a filter or shaded lens (not clear).
- V The lens is variable-tint photochromic (light adjusting).

IMPACT SPEED

THE SECRET BEHIND

The picture is showing a Saber Advanced lens, which has been shot from only 10 meters distance using a 12 gauge shotgun with Modified Choke and shooting with steel shot size #7. As the picture shows, the lens was hit by multiple pellets - no cracks or penetration on the back of the lens leaving the eyes intact and protected.

PRESCRIPTION LENSES

As our professional prescription lens partner, we have chosen Shamir, whose Attitude™ lenses are specifically developed for our 8-base curve Wiley X frames. The result is individually customized lenses that offer crystal clear vision in any given situation, while providing the same crucial protection as the non-prescription lenses developed by Wiley X.

The RX program enables simple ordering and delivery of single vision and progressive corrective lenses through your nearest optician.

POLYCARBONATE LENSES

To meet the stringent worldwide safety eyewear standards, Wiley X uses the lens material called polycarbonate. The flexibility and strength of polycarbonate enables it to stop the impact from a 12 gauge shotgun or fragments from an IED (Improvised Explosive Device). Wiley X applies anti-scratch coatings on all lenses to increase the lifetime and maintain a top of the line product.

FILTER 8™ POLARIZATION

Glare off the water and other light colored surfaces can diminish vision at critical moments and cause eye fatigue

- Two Slick™ hydrophobic coatings
- Two Selenite™ polycarbonate lenses
- Two T-Shell™ scratch-resistant layers
- One Violet 4™ anti-reflective coating
- Filter 8™ polarized film layer that creates 100% polarization with 100% UV protection

Wiley X Filter 8™ polarized lenses prevent eye fatigue and diminished vision, which can have critical effects. The Wiley X polarized lenses are better at filtering the light, which ensures unequal clarity and contrast. It is innovative technologies like these that make Wiley X the obvious choice during all water activities, as well as driving.

SMART EDGE LENS TECHNOLOGY

Our SEL (Smart Edge Lens) technology lenses are de-centered and tapered to ensure they can meet ANSI & EN166 optical clarity standards. They also block 100% of the sun's harmful UVA and UVB rays according to EN170:2002.

RESOLVING POWER (CLARITY)

Ordinary lenses can distort objects viewed from a distance. As measured in tests utilizing the NBS Pattern 20, Wiley X lenses provide a clear view.

REFRACTIVE POWER

Inferior lenses can alter the true size of objects, as if looking through another person's prescription lenses. Wiley X rated lenses maintain true relative object size.

PRISMATIC POWER

It is common for ordinary lenses to bend light, causing focal objects to appear off center. Wiley X rated lenses provide a true spatial relationship of objects in the field of view.

WILEY X FRAME & LENS DESIGNS

Wiley X ultra protective eyewear uses the world's most durable and lightweight materials: shatterproof Selenite™ polycarbonate lenses with scratch resistant T-Shell™ Hardcoat and virtually indestructible Triloid™ nylon frames. Wiley X is the only premium eyewear manufacturer whose entire line is safety rated.

HALF FRAME DESIGN

BJARNE LYNGSØ / Hunter

CAMO & OUTDOOR PATTERNS

Realtree® is the creator and marketer of the world's most versatile camo patterns. No matter where you hunt or enjoy the outdoors, there is no better way to blend in with your surroundings than by wearing Realtree Xtra® Camo.

Kryptek® provides combat proven features and designs in ultra-high-performance technical and tactical outdoor adventure apparel. Kryptek® products are continuously tested and proven in austere combat environments and extreme hunting conditions. Constant improvement and feedback is implemented into future designs with the end-goal of providing products to outdoor adventurers who demand the utmost in quality and overall performance in their gear.

REALTREE XTRA® CAMO

The Xtra in Realtree Xtra® stands for extra effectiveness in the field. This new camo pattern blends perfectly year round in a variety of habitats. It blends best from the leaf change of fall through winter, then again in early spring before green-out.

KRYPTEK® TYPHON™

Darkness is the ally of the predator that prowls at night. Kryptek® Typhon™ serves those who operate when and where others will not venture.

WILEY X PRESCRIPTION INSERT

Why choose an eyewear model with a prescription (RX) insert instead of having the prescription in the outer lens?

If you need prescription lenses, choosing a Wiley X model with an RX insert provides you with the following advantages compared to models where the prescription lenses are built directly into the frame (full frame design).

- Easy and cheaper to replace an outer lens which has no prescription
- Up to 5 different front lens color options - allowing you to adjust to any given light condition
- Everyone can use the eyewear without the insert
- Still certified as safety eyewear
- Inserts match different models (see below)

The PTX insert can be used in the following models:
Saber Advanced, WX Vapor, WX Rogue & WX Rogue Comm.

360° NOSE PIECE

A wire core makes this nose piece fully adjustable. Specially developed rubber on top of the wire core guarantees a superior grip during almost any activity. The rubber is also very robust and so comfortable that the glasses can be worn all day without any discomfort.

- Prepared to hold the Wiley X PTX prescription insert
- Adjustable to all nose shapes and sizes
- Specially developed rubber coating for superior grip and high comfort

ICON DESCRIPTIONS

HIGH VELOCITY PROTECTION RATED

Meets and exceeds ANSI Z87.1 high velocity impact safety and optical standards.

EN.166S CERTIFIED

Frame and lens must withstand the impact of a 22 mm steel ball weighing 43 grams dropped from 1,3 meters at a speed of 18 km/h. The lens must remain in the frame and should not be shattered. The frame must remain intact as well.

EN.166F CERTIFIED

Frame and lens must withstand the impact of a 6 mm steel ball weighing 0,86 gram fired at 162 km/h. The lens must remain in the frame and should not be shattered. The frame must remain intact as well.

BALLISTIC TESTED

Meets or exceeds MIL-PRF-32432 (GL) ballistic standards for spectacles. Frame and lens must withstand a 3,8 mm projectiles fired at 700-720 km/h at only 60 cm distance. This ensures our lenses and frames are practically indestructible.

PRESCRIPTION READY

Wiley X frames can be fitted with a prescription safety lens that meets the safety requirements.

FILTER 8™ POLARIZATION

Our proprietary polarized lens technology adds 100% polarization to 100% ultra violet protection for unequalled clarity and contrast.

HARD COATING

Scratch resistant coating protects against damage and extends the life of the lens.

ANTI-REFLECTIVE COATING

Anti-reflective coating eliminates distracting reflections of the lens surfaces

ANTI-FOG COATING

Anti-fog coating prevents misting on the lens in high humidity and temperature differences.

HYDROPHOBIC COATING

Hydrophobic (hydro = water, phobic = fear) water repellent coating. Lets the water slide off instead of sticking to the lens.

LENS OPTIONS

SMOKE GREY LENSES

Maximum glare reduction. Won't distort colors. Excellent in bright/glare conditions. Light transmission: 14% - 20% depending on frame. 12%-14% polarized depending on frame.

CLEAR LENSES

Maximum light transmission. See precise color values. Hazy or overcast, dusk/dawn conditions. Light transmission: 89%.

LIGHT RUST LENSES

Filters out most blue light waves, the chief component of glare and haze. Enhance contrast in medium to low light conditions. Light transmission 60%

PALE YELLOW LENSES

Best light enhancing lens tint. Enhances contrast in low to extremely low light conditions, haze, etc. Light transmission: 86%.

VERMILLION LENSES

Best for medium to low light conditions. Sharpens contrast and brightens targets. Light transmission: 50%.

SMOKE GREEN LENSES

Maximum glare reduction without distorting colors. Great for general daytime use. Light transmission: 13% polarized.

CRIMSON MIRROR SMOKE GREY LENSES

Excellent for constant sun or very bright conditions. Reduces glare and improves contrast. Light transmission 15% polarized.

BLUE MIRROR GREEN LENSES

Multi-coat, high contrast green lenses. Absorb reflections across mirror surface, diminish glare. Ideal in bright conditions. Light transmission: 12% polarized.

ALLAN BAK / Hunter

HUNTING & SHOOTING

Hunting or shooting - every person should wear safety eyewear. This collection will sharpen your vision and provide protection from misfires, tree branches, stray bullets, or clay particles, while enhancing your overall performance.

Styles are available in different lens variations of one, two and three lens packages combining ballistic protection and optical perfection with versatile and adjustable frames. Most Wiley X hunting and shooting styles have a rubberized nose bridge adjustable to any nose size and shape. Dock and lock the T-Peg™ elastic strap to the temples and stop worrying about losing your eye protection no matter the terrain.

Wiley X provides an unparalleled level of vision protection, optical performance and versatility.

MICHAEL BECH "HUNT MY PASSION" / Wiley X ambassador

CHANGEABLE EYEWEAR

With a wide range of available configurations and the option to purchase additional lenses, the Changeable Eyewear can easily adapt to a wide variety of tasks and light conditions. These lenses are designed to be easily removed and replaced in the field and for the ability to quickly adjust to any light conditions in any given shooting situation. A good snug fit is essential and so is the proper lens tint based on the type of shooting being performed.

In low light conditions, such as early morning or overcast days, either a clear lens or a yellow contrast enhancing lens is recommended. A yellow contrast enhancing lens will absorb blue light, which appears during overcast days. This will help make objects against this color background appear brighter to help you better distinguish the target. For hunting and clay shooting the most popular tint is a light rust. This tint is used under bright light conditions enhancing contrast and lowering the amount of light reaching your eye to enhance target recognition. Vermillion lenses sharpen contrast and brighten targets. Smoke grey lens is excellent in bright/glare conditions.

BJARNE LYNGSØ // Hunter

COMM TEMPLE SYSTEM

The new very thin Comm Temples offer the user of shooting earmuffs and other ear mounted communication devices a comfortable fit. Almost not noticeable, it will keep you focused during a long day at the shooting range or during the hunt. The thin design prevents irritation at any time. Available on all WX Rogue Comm models.

ALBERTO RIZZINI / Wiley X Elite Shooting Team

BRYNJAR THOR HREGGVIDSSON

HUNTING GUIDE AT BG-HUNT, ICELAND

I have been shooting for as long as I can remember. As I grew my left eye started to be my dominant eye. It would be nice being left handed but I'm not! Over the years I have practiced a technique to close my left eye the moment I fire my shotgun at prey or clays, however this has its limitations.

I tried Wiley X shooting glasses and I could immediately notice the effect! First my perception on the environment was blurred but after a minute this changed. I could feel how my right eye was taking over, suddenly everything was clear again. The longer I wore my Wiley X glasses the more dominant my right eye became. I went shooting the day after I got my glasses, although my vision on my barrel didn't change so much I was more focused and with immediate effect it was easier to aim and shoot. Wearing these glasses gave me more confidence and I was more accurate, the purpose was achieved. I have now started to wear them on a more regular basis and I can feel that they sure help my cross-eyed dilemma.

These I will always wear when I go out hunting but you have to train up the weaker eye and that will take more time; therefore I'm using them more frequently. I am 100 per cent sure that the glasses help me when hunting, not mention the safety and protection for my eyes that these glasses give me. I had never paid any attention to the risk I'm putting to my eyes while hunting. There is a great risk of damaging my hearing and my eyes. That is something I don't want to take a risk at any more.

I recommend to other hunters to always use earplugs or headset while hunting as well as using Wiley X shooting glasses.

WILEY X CURES CROSS EYE DOMINATION

When shouldering the gun to your right shoulder and aiming with your left eye being your master eye, this is cross eye domination. It is the same story if you shoulder the gun to your left shoulder and aim using your right eye as your master eye. When doing so the line of the gun and the line of the sight are not in line (see the illustration), and as you are not looking straight down the barrel you will often miss your target. This problem has often been solved either by closing the dominant eye, using a piece of cardboard covering the dominant eye, or even using a pair of glasses blinding the dominant eye with tape or a marker.

These solutions have serious disadvantages:

- You will not be able to evaluate distances with only one eye
- No eye protection
- Not 100% field of view

Cross eye domination can in most cases be "cured" by using Wiley X protective eyewear. Wiley X Ballistic, ANSI rated and EN.166 certified lenses provide a true spatial relationship of objects in the field of view. By mounting a smoke grey colored lens in front of the dominant eye and a light rust colored lens (contrast enhancement color) in front of the other eye, the domination will in most cases change to the other eye and thereby solve the cross eye problem.

This provides the following advantages:

- No cross eye domination problem
- 100% eye protection
- 100% distance evaluation
- 100% field of view
- RX ready (prescription)

The human brain can't adopt the two different colors and therefore the two colors (smoke grey and light rust) will become one.

White line indicating line of gun. Orange line indicating line of sight. As the two lines are not parallel the shooter will NOT hit what he is aiming at.

APPAREL & ACCESSORIES

The Wiley X apparel and accessories collection gives you the chance to gear up with additional eyewear cases, straps and other accessories including clothing - so when you just can't get enough or you lose an item, Wiley X has got your back.

ESTABLISHED IN 1987

The Wiley X 87 EST. apparel collection is characterized by high quality fabrics, snug fitting and modern design. Like the eyewear of Wiley X, the apparel collection stands out, no matter what activity you challenge.

WX PREMIUM TECH JACKET

J610. / Charcoal with Flash Green / 100% Polyester / 190 g.

The Wiley X Tech Jacket is made from lightweight and wind-resistant shell. The design offers exceptional mobility, and the two-way adjustable hood allows perfect fitting. Three-layer ID® Tech quality with a knitted surface providing a soft stretch quality. YKK Zipper puller in easy-grip rubber. WX signature flash green contrast trimmings. The look is finished with recognizable tone-in-tone prints referring to the Wiley X year of establishment (87 EST), and the Company's foundation stone: Absolute. Premium. Protection.
